

# PBSS5160DS

60 V, 1 A PNP low  $V_{CEsat}$  (BISS) transistor

Rev. 02 — 28 June 2005

Product data sheet

## 1. Product profile

### 1.1 General description

PNP/PNP low  $V_{CEsat}$  Breakthrough in Small Signal (BISS) transistor pair in a SOT457 (SC-74) Surface Mounted Device (SMD) plastic package.

NPN complement: PBSS4160DS.

### 1.2 Features

- Low collector-emitter saturation voltage  $V_{CEsat}$
- High collector current capability:  $I_C$  and  $I_{CM}$
- High collector current gain ( $h_{FE}$ ) at high  $I_C$
- High efficiency due to less heat generation
- Smaller required Printed-Circuit Board (PCB) area than for conventional transistors

### 1.3 Applications

- Dual low power switches (e.g. motors, fans)
- Automotive applications

### 1.4 Quick reference data

Table 1: Quick reference data

| Symbol      | Parameter                               | Conditions                       | Min | Typ | Max | Unit |           |
|-------------|---|----------------------------------|-----|-----|-----|------|-----------|
| $V_{CEO}$   | collector-emitter voltage               | open base                        | -   | -   | -60 | V    |           |
| $I_C$       | collector current (DC)                  |                                  | [1] | -   | -1  | A    |           |
| $I_{CM}$    | peak collector current                  | single pulse;<br>$t_p \leq 1$ ms | -   | -   | -2  | A    |           |
| $R_{CEsat}$ | collector-emitter saturation resistance | $I_C = -1$ A;<br>$I_B = -100$ mA | [2] | -   | 250 | 330  | $m\Omega$ |

[1] Device mounted on a ceramic PCB,  $Al_2O_3$ , standard footprint.

[2] Pulse test:  $t_p \leq 300$   $\mu$ s;  $\delta \leq 0.02$ .

PHILIPS

## 2. Pinning information

Table 2: Pinning

| Pin | Description   | Simplified outline | Symbol |
|-----|---------------|--------------------|--------|
| 1   | emitter TR1   |                    |        |
| 2   | base TR1      |                    |        |
| 3   | collector TR2 |                    |        |
| 4   | emitter TR2   |                    |        |
| 5   | base TR2      |                    |        |
| 6   | collector TR1 |                    |        |

sym018

## 3. Ordering information

Table 3: Ordering information

| Type number | Package |  |  | Version |
|-------------|---------|--|--|---------|
|             | Name    | Description                              |  |         |
| PBSS5160DS  | SC-74   | plastic surface mounted package; 6 leads |  | SOT457  |

## 4. Marking

Table 4: Marking codes

| Type number | Marking code |
|-------------|--------------|
| PBSS5160DS  | A5           |

## 5. Limiting values

Table 5: Limiting values

In accordance with the Absolute Maximum Rating System (IEC 60134).

| Symbol                | Parameter                 | Conditions                    | Min   | Max   | Unit |
|-----------------------|---------------------------|-------------------------------|-------|-------|------|
| <b>Per transistor</b> |                           |                               |       |       |      |
| $V_{CBO}$             | collector-base voltage    | open emitter                  | -     | -80   | V    |

## 13. Data sheet status

| Level | Data sheet status <sup>[1]</sup> | Product status <sup>[2][3]</sup> | Definition   |
|-------|----------------------------------|----------------------------------|--|
| I     | Objective data                   | Development                      | This data sheet contains data from the objective specification for product development. Philips Semiconductors reserves the right to change the specification in any manner without notice.  |
| II    | Preliminary data                 | Qualification                    | This data sheet contains data from the preliminary specification. Supplementary data will be published at a later date. Philips Semiconductors reserves the right to change the specification without notice, in order to improve the design and supply the best possible product.             |
| III   | Product data                     | Production                       | This data sheet contains data from the product specification. Philips Semiconductors reserves the right to make changes at any time in order to improve the design, manufacturing and supply. Relevant changes will be communicated via a Customer Product/Process Change Notification (CPCN). |

[1] Please consult the most recently issued data sheet before initiating or completing a design.

[2] The product status of the device(s) described in this data sheet may have changed since this data sheet was published. The latest information is available on the Internet at URL <http://www.semiconductors.philips.com>.

[3] For data sheets describing multiple type numbers, the highest-level product status determines the data sheet status.

## 14. Definitions

**Short-form specification** — The data in a short-form specification is extracted from a full data sheet with the same type number and title. For detailed information see the relevant data sheet or data handbook.

**Limiting values definition** — Limiting values given are in accordance with the Absolute Maximum Rating System (IEC 60134). Stress above one or more of the limiting values may cause permanent damage to the device. These are stress ratings only and operation of the device at these or at any other conditions above those given in the Characteristics sections of the specification is not implied. Exposure to limiting values for extended periods may affect device reliability.

**Application information** — Applications that are described herein for any of these products are for illustrative purposes only. Philips Semiconductors make no representation or warranty that such applications will be suitable for the specified use without further testing or modification.

customers using or selling these products for use in such applications do so at their own risk and agree to fully indemnify Philips Semiconductors for any damages resulting from such application.

**Right to make changes** — Philips Semiconductors reserves the right to make changes in the products - including circuits, standard cells, and/or software - described or contained herein in order to improve design and/or performance. When the product is in full production (status 'Production'), relevant changes will be communicated via a Customer Product/Process Change Notification (CPCN). Philips Semiconductors assumes no responsibility or liability for the use of any of these products, conveys no license or title under any patent, copyright, or mask work right to these products, and makes no representations or warranties that these products are free from patent, copyright, or mask work right infringement, unless otherwise specified.

## 16. Trademarks

**Notice** — All referenced brands, product names, service names and trademarks are the property of their respective owners.

## 15. Disclaimers

**Life support** — These products are not designed for use in life support appliances, devices, or systems where malfunction of these products can reasonably be expected to result in personal injury. Philips Semiconductors
